DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 8-16 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ake.

Ake discloses a device capable of detecting and displaying the relative position of a generally horizontal reference plane of light comprising a vertically oriented row wherein photodetector elements provide electrical output when illuminated with a plane of light, an output circuit for determining the relative levels of reference signals, a weighting circuit for providing electrical output of photodetector elements and a display for providing an indication of position of the reference plane of light with respect to the detector device. Although Ake does not claim an additional row of photodetector elements, he teaches that shading of the elements by the edge of the case can be corrected by realignment or rearrangement of photodetectors in the device(see patent 4907874, columns 1 and 2). It would have been obvious to one of ordinary skill in the art at the time of the invention to add an additional row of elements to improve detection, since Ake teaches that the realignment and rearrangement of photodetectors can be used to improve detection and eliminate problems caused by shading.

Allowable Subject Matter

Claims 5-7 and 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
